To whom it may concern,

This letter is in regards to the community of Mogul and its exposure to the threat of wildland fire. Mogul is technically categorized in a “moderate” fire risk zone. That being said, with I-80 being next to the community (serves as a source for ignition), the community’s limited access and egress, and it’s orientation on a southwest facing slope at the mouth of the Truckee River Canyon (funnels winds); Mogul should not take the threat of wildland fire lightly.

Citizens living in the community of Mogul are strongly encouraged to establish defensible space of at least 30 feet, and implement additional practices as outlined by Living With Fire publications and guidelines.

Over the coming year, TMFPD in conjunction with Nevada Division of Forestry will be engaged with communities in the area regarding fire safety programs available to the District and its citizens.

Thank you for your time,

A handwritten signature in blue ink, appearing to read "August Isernhagen".
